

# Applications for the 2026 ArCSⅢ Overseas Fellowship Program

Information/calls for application 2026/2/27

In accordance with the objectives of the Arctic Challenge for Sustainability-3 (ArCSⅢ) project.

We implement programs for the support of early career professionals. The ArCSⅢ project provides funding to graduate students, early career researchers belonging to Japanese universities and other research institutions, as well as young practitioners from public and private institutions, to support their participation in international conferences for making presentations and collecting information, as well as their stay at overseas universities and research institutions for conducting research and expanding contacts along with fieldwork trips. We expect that these programs will stimulate further research and other activities by early career professionals and will help them expand their personal network at the international levels.

You can visit the web page containing the interviews of the participants of the previous project (ArCS II)

We hope the stories of their experience will be instructive.

*Voices of the participants of the Overseas Fellowship program* \*Japanese only
